

# The 41<sup>st</sup> JCCP International Symposium

## - January 26, 2023 Tokyo, Japan

“Strategies and initiatives for oil and gas in times of global economic upheaval: Stable supply and green transformation”

## Opening

Opening: Mr. Tsuyoshi Nakai  
CEO, JCCP

Address: Mr. SUZUKI Yasuhiro  
Chairman of the Board, JCCP

Address: Mr. WAKATSUKI Kazuhiro,  
Director Policy Planning Division, Natural  
Resources and Fuel Department, METI

The 41st JCCP International Symposium was held in a hybrid format.

The main theme of this year's symposium was “Strategies & Initiatives for Oil & Gas in Times of Global Economic Upheaval.” We discussed the key issues of “leadership and HR development in times of change,” and “technology development and business strategies” at each panel with the participation of leaders in each field from oil-producing countries, aiming to balance stable supply and decarbonization. We deepened insights into the future business development and sustainability of the oil and gas industry in the international community.

Approximately 600 people participated, from the Japanese Ministry of Economy, Trade and Industry; oil-producing companies; respective embassies in Japan; government offices; and Japanese and foreign companies and organizations.

## Leaders Panel 1 “ Strategies and initiatives for oil and gas in times of global economic upheaval: Stable supply and green transformation”

**Moderator:**  
**Mr. NAKAI Tsuyoshi**  
CEO, JCCP

Please refer to previous page for the presentation materials.

At Leaders Panel 1, there was an active exchange of opinions among government officials from Middle Eastern and Asian oil and gas producers, and Japanese and foreign experts in the oil, gas, energy, and technology fields on the stable supply of energy and implementation of green transformation. The oil and gas industries face common challenges such as carbon neutrality and stable supply, further increasing opportunities for cooperation between respective countries and companies. We re-confirmed the importance of cooperation among the oil and gas industries of consumers and producers in order to continue contributing to the international community through the energy business.

Participants of Panel 1

## Leaders Panel 2 “Leadership and HR development responding to management strategies in times of change”

Chairperson:  
Mr. KIMURA Hiroyuki  
Managing Executive Officer  
ENEOS Corp.

Please refer to previous page for the presentation materials.

Participants of Panel 2

Leaders Panel 2 focused on Leadership and HR development. While the position and environment in which each country and company is placed differ, we discussed the development of leaders, which is a challenge we have in common, as we reach these times of change. The panelists introduced practical cases and concrete initiatives, sharing hints for transformation. It was a panel that made us confirm anew that the management of HR and leadership were essential for management reform.  
(From the Chairperson’s review)

## Leaders Panel 3 “Looking to the future with carbon management technologies”

Chairperson:  
Mr. MIZUGUCHI Yoshihiro  
Executive Officer, CTO  
JGC HD Corp

Please refer to previous page for the presentation materials.

At Leaders Panel 3, we were able to share how each country was expanding and advancing initiatives in accordance with their respective situations and utilizing their strengths for the development of technology in carbon management.

On the other hand, with the backlash against fossil fuels, efforts to resolve issues toward the stable supply of transient energy were also revealed. We strongly felt the necessity of advancing the development of technologies that contribute to building a value chain of sustainable energy through international co-creation that utilizes the strength and characteristics of each country and within a more realistic timeline.
